WHO WE ARE?

🌍 Mechanic International

Innovation, customization, and reliability since 1996.
Mechanic International is a dynamic family-owned company, based in Asse, on the outskirts of Brussels.

For over 25 years, we have been active in Belgium and across Europe, applying our expertise in a wide range of sectors.

At Mechanic International, we believe in direct communication and fast decision-making. Together with you, we look for solutions that truly work.
Our open, flexible communication leads to fresh ideas, personal involvement, and sustainable results.

We focus on three main pillars:

Modular container solutions
With our containers, we provide flexible and sustainable solutions for both temporary and permanent projects. We guide your project from A to Z: from design and production to transport and installation. Everything is tailored to your specific needs.

Container accessories for comfort and efficiency
We offer a wide range of accessories that make your container safer, more practical, and more comfortable. From locks and lockboxes to shelving, ventilation, and coupling systems all tailored to your project and easy to install.

Mechanical and electronic security solutions
We provide locks and anti-theft systems for containers and rolling equipment.
From classic cylinders and padlocks to smart Bluetooth-enabled electronic systems always reliable and user-friendly.

At Mechanic International, a creative approach, transparency, and customer focus are at the heart of everything we do.

That is the foundation of our success and yours.

- Electronic solutions

SHIPPING CONTAINERS

Our shipping containers are ideal for transport, storage, or creative repurposing.

Available in various sizes, both new and used, they are strong, wind and watertight.
Perfectly suited for safe and durable use, anywhere in the world.

Type	External Dimensions (mm)			Internal Dimensions (mm)			
	Length	Width	Height	Length	Width	Height	Weight
10FT DV	2.991	2.438	2.591	2.831	2.350	2.390	1300 kg
20FT DV	6.058	2.438	2.591	5.898	2.350	2.390	2200 kg
40FT DV	12.192	2.438	2.591	12.032	2.350	2.390	3800 kg
20FT HC	6.058	2.438	2.896	5.898	2.350	2.680	2500 kg
40FT HC	12.192	2.438	2.896	12.032	2.350	2.680	4100 kg
45FT HC	13.720	2.438	2.896	13.350	2.350	2.680	4500 kg

Mechanic provides expert advice for container projects.

Containers offer modular solutions for both temporary and permanent projects.
We deliver tailor made containers and take care of the design, production, transport, and installation of your units.

In addition, we also carry out modifications on existing units or shipping containers.

With many years of experience in the construction and logistics sectors, we can quickly assess which solution can be applied and which best fits your needs.

PADLOCKS AND COMBINATION LOCKS

We offer a wide range of padlocks and combination locks from
Assa Abloy, Squire, and Abus.
Perfect for securing your containers, machinery, and storage facilities.
All our locks are high-quality and available in various sizes and security levels,
ensuring you always find the right solution.

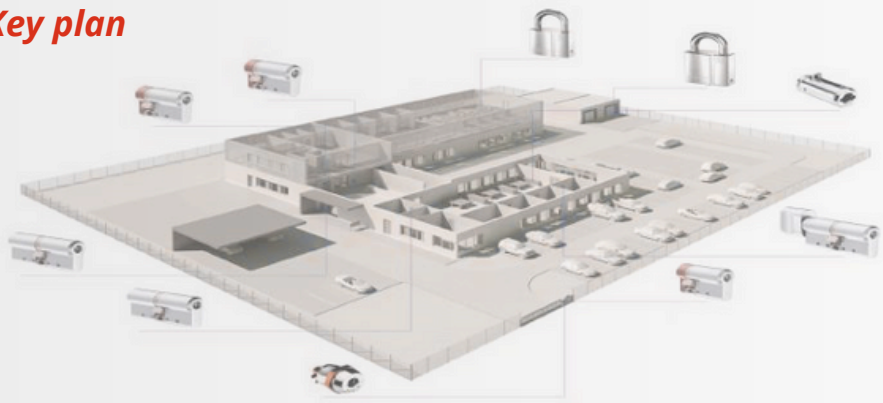

CYLINDERS AND KEY PLANS

We supply high-quality cylinder locks from Assa Abloy.
Thanks to secured key profiles and certificates, unauthorized copies are prevented.
Available in different keying options: keyed different, keyed alike, or master key systems.
This way, you combine convenience with maximum security.

The power of combination.

Together with you, we create a clear and flexible key plan tailored to your organization.
A key plan gives you control over who has access to which rooms or containers.
Safe, transparent, and easy to manage.

CONTAINER LOCKS

Our container locks provide maximum protection against burglary and theft.
From simple lockboxes to high-security locks, each lock is designed for heavy-duty use and fits various container types, trailers, and loading platforms.
This way, you can be sure that your goods are always stored safely and securely.

TRANSPORT SECURITY

For the safe transport of your goods, we provide solutions that prevent unauthorized access and theft.
With certified locks, seals, and smart anti-theft systems, your cargo remains
fully protected while on the move.
Reliable, user-friendly, and tailored to your specific logistical needs.

ELECTRONIC SOLUTIONS

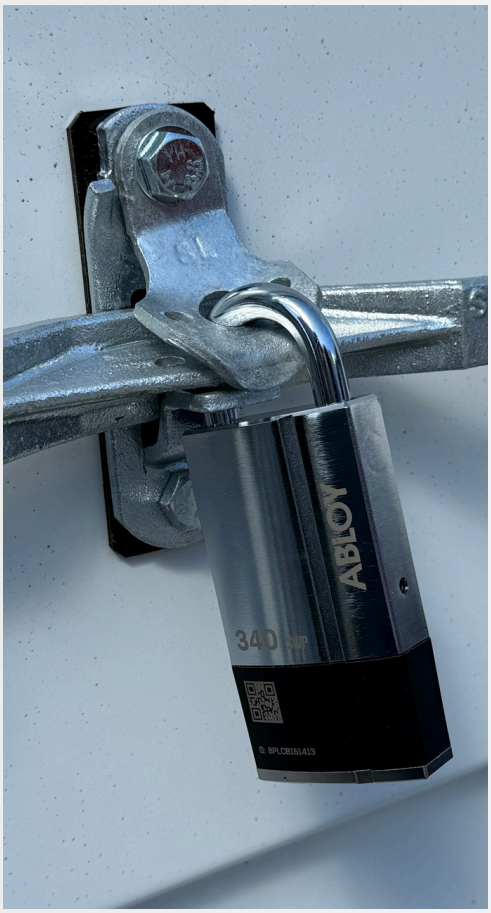

CLIQ, the convenient smart key digital access solution.

These digital and electromechanical intelligent locks are used worldwide to secure facilities.
By using CLIQ programmable smart keys and battery-free cylinders, the risks of lost or stolen mechanical keys are minimized, saving businesses the hassle and cost of replacing locks.
Both the electromechanical PROTEC² CLIQ and the fully electronic CLIQ devices offer a choice of more than 60 types of cylinders and padlocks to secure doors, cabinets, drawers, gates, and much more.
CLIQ keys are easy to update via wall-mounted, desktop, or portable programmers, or with CLIQ Connect Bluetooth keys through the CLIQ Connect mobile app.

ELECTRONIC SOLUTIONS

The CUMULUS locking solutions are specifically designed for keyless access and operate even without a network connection.
This system uses user-friendly Bluetooth technology, allowing the locks to be managed and operated directly from your smartphone.
Together with Assa Abloy, Mechanic International provides reliable and straightforward physical security for all environments.

TRANSPORT AND INSTALLATION

Mechanic International offers specialized transport and installation services for all types of containers.
With our modern fleet, experienced drivers, and crane trucks, we guarantee fast, safe, and hassle-free service in Belgium, the Benelux, and tailored solutions across the EU.
We handle both delivery and relocation of containers, fully aligned with your schedule.
Our experts ensure precise and stable installation. Even challenging terrains are no obstacle thanks to our specialized crane trucks.
